## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest alone or in combination, the limitations: "wherein the dimming unit (means for controlling) gradually decreases an effective value of a light source applied voltage to extinguish the lamp unit, and sets the effective value of the light source applied voltage to zero in one stroke when the effective value of the applied voltage has decreased to a threshold value; wherein the dimming control decreases the effective value of the voltage applied to the light source to a threshold value over a predetermined period of time" in a manner claimed in claim 1; and "wherein the dimming unit (means for controlling) gradually decreases an effective value of a light source applied voltage to extinguish the one of the lamp unit and the auxiliary lamp (at least one of the lamp unit and the auxiliary lamp), and sets the effective value of the applied voltage to zero in one stroke when the effective value of the applied voltage has decreased to a threshold value; and wherein the dimming control (means for controlling) decreases the effective value of the voltage applied to the light source to the threshold value over a predetermined period of time" in a manner claimed in claims 8 and 15. It is for this reason in combination with all the other limitations in the independent claims 1, 8 and 15, that claims 1-15 are allowable over prior art of record.

### ***Conclusion***
